DETAILED ACTION

I. The Art Unit location of this application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 2617.

Continued Examination Under 37 CFR 1.114

II. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/16/2006 has been entered.

III. The current office-action is in response to the amendments/remarks filed on 06/16/2006. Accordingly, Claims 1-30 are cancelled and Claims 31-49 is imminent for further assessment as follows:

Response to Amendments & Arguments

IV. The amendment filed on 06/16/2006 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because “The new claims intended for a remote gaming device having a memory arranged to store location data defining

an authorized gaming area for the gaming source, the remote gaming device further having a location determination system arranged to determine a physical location of the remote gaming device, wherein the remote gaming device is placed in an active condition for game play using the game play signals when the physical location of the remote gaming device is within the authorized gaming area.” However in the cancelled claim the innovation was dissimilar as representing in the original claims filed on 04/25/2006 “an **RF sub-carrier broadcast station**, the station communicating game play signals developed by the gaming source; at least one player device disposed at a first location, the player device including electronic game play means for enabling a player to make a wager by inputting wager data, and to commence game play by causing an activation signal communicated from the RF sub-carrier broadcast station to be received and processed; and wherein the player device is placed in condition to receive said activation signal by the device's first location being within a bounded authorized area.”

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
